RoHS Compliance Statement

Continental Cordage Corporation purchases commercial grade Bare Copper and Tin Plated Copper for the production of braided wire products and wire bobbins.

Our products do not contain Mercury, Hexavalent Chromium, PBB Flame Retardant or PBDE Flame Retardant.

Copper and Tin both contain trace amounts of Lead and Cadmium. Copper also contains a trace amount of elemental Chromium. These materials are present in the following quantities, as represented to us by suppliers:

Copper		RoHS Compliance Limit
Lead	< 0.0001%	0.10%
Cadmium	< 0.00005%	0.01%
Chromium	< 0.00005%	0.10%
Tin		
Lead	0.0030% – 0.0035%	0.10%
Cadmium	0.0005% – 0.0010%	0.01%

**All products manufactured by Continental Cordage Corporation
are in full compliance with the European RoHS Directive(s).**
